DETAILED ACTION

Claim Objections

1. Claims 1-21 are objected to because of the following informalities: "LED" should be changed to what it refers. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Li et al. [US 6,966,685].

Regarding claim 1, Li et al. discloses an LED light spreader [10, 40] having a series of partial cylindrical lengths [22, 23] interposed with partial frustoconical lengths [18, 20] forming an elongated member having a rounded surface [cylindrical] and a light emitting surface (figures 1-4, whole document).

Regarding claim 2, Li et al. discloses the elongated member being comprised of a transparent material (figure 3).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al. in view of Chinniah et al. [US 2003/0235046].

Regarding claim 3, Li et al. discloses a rounded reflective surface [at 22, D1] (figure 3), but does not clearly disclose the rounded surface being coated with a reflective material.

Chinniah et al, discloses a reflective surface [50, 150, 212, 208] inheritance with a coated reflective material (figures 2, 4 and 11).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the rounded reflective surface of Li et al. with the coated reflective material as inheritance taught by Chinniah et al. for purpose of providing an advantageous way of increasing brightness.

Allowable Subject Matter

6. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 4, the elongated member further comprises a semicircular light gathering end.

Claim 5, the light emitting surface is planar.

Claim 6, the emitting surface is curved inward.

7. Claims 7-21 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 7, 12 and 17, an elongated LED light spreader comprises, in combination, a planar light transmitting side as claimed.

Claims 8-11, 13-16 and 18-21 are dependent on claims 7, 12 and 17, respectively.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.

Response to Amendment

8. Applicant's amendments and arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection. A new reference, Li et al. is applied.
